

TABLE-TOP SHRINK WRAPPING

W-SERIES L-BAR SEALERS

sealersales

Compact Unit to Quickly Shrink Wrap

- Ideal for quick and easy shrink film packaging (seals 6-8 packages/minute)
- Heavy duty construction for durability
- Adjustable work table height for different packages
- Heating element located on the upper jaw
- Includes film roller, twin perforating hole punch, film separator, work table and heat gun holder

Efficient and user-friendly, our **W-Series L-Bar Sealers** are ideal for shrink wrapping, producing clean, factory-fresh results. These sealers ensure your packages are dust, moisture and fingerprint-free and provide tamper-evident protection.

With one step, our L-Bar sealer cuts and seals film up to 26" wide (depending on the model). Built with durable metal, these machines offer long-lasting quality. Each unit comes equipped with a film roller, twin perforating hole punch, film separator, adjustable work table and an upright heat gun holder (w/ built electrical outlet).

Easy Operation:

Set the timer. Place your product between two layers of centerfold film. Bring sealing arm down to activate sealing process. Use a heat gun or shrink tunnel (we recommend our CN-4520A) to shrink the film tightly around the package. Please note our L-Bar sealers do not include a heat gun or shrink tunnel. Must be purchased separately.
