Important Safety Tips

- Please read the user manual carefully before use and keep it properly for future reference.
- When we use the electrical appliances, we should have the most basic safety knowledge to avoid fire disaster, electric shock and other injuries. Therefore, please follow the instructions below.

	In use of electrical appliances, we should pay attention to safety, to avoid the risks of fire disaster, electric shock and other injuries.		The air purifier must be used vertically.
	Please don't place the adapter under the carpet or close to heat source.		Please don't let objects fall into the machine via the air outlet, which may damage the air purifier.
	When the indicator light for replacing the filter screen flashes, replace the consumable to ensure the cleaning effect of the air purifier.		Please don't sit, stand or place objects on the air purifier.
	If the product you received is damaged, please don't use it.		Please don't use the air purifier in the place with flammable gases or steams.
	Please don't use the machine if the filter screen is not installed.		Please don't use the product outdoors or with the doors and windows open.
	Please don't use the product near the humid or easily splashed place, such as bathroom, kitchen, sink and heavily damp basement.		If the machine is not electrified, it must be repaired or replaced by the manufacturer or its authorized service point and maintenance personnel to avoid danger.

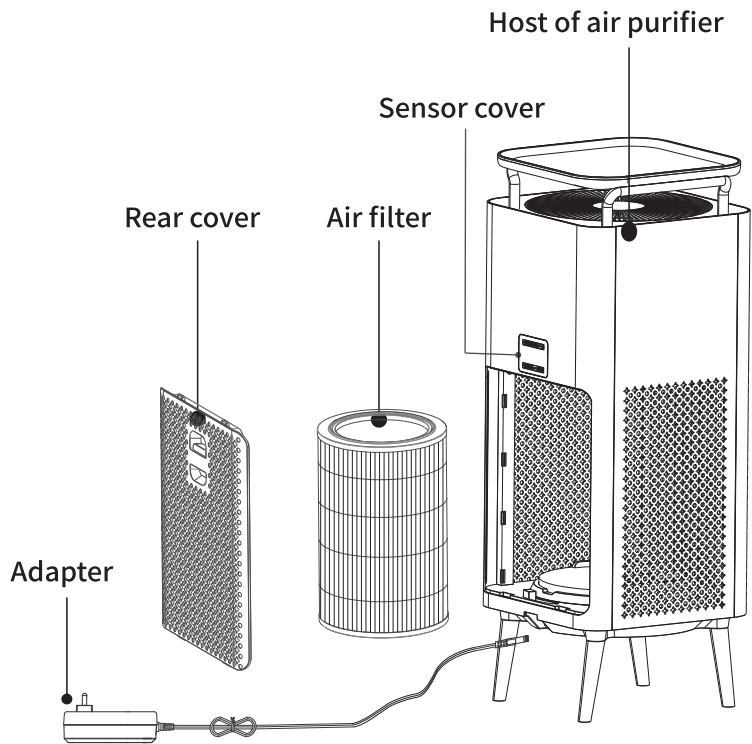

Caution

- This product is not recommended to be used by the users (including children) with insufficient physical, perceptive, mental ability, experience or knowledge, except under the supervision or guidance by the personnel responsible for his/her safety.
- Children should be supervised to ensure that they do not play with the electrical appliance.

【 Preparations before Use 】

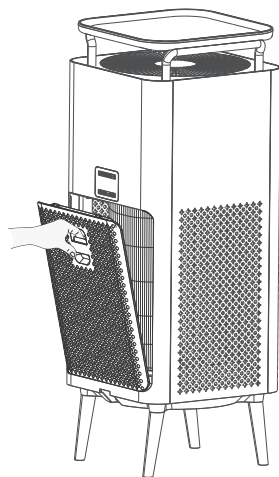

- Take the air purifier from the packing box and place it on a smooth floor. The periphery of the machine body should at least more than 50cm away from the wall or other furniture to facilitate air circulation.
- Notes: before use, you must remove all the packaging materials (especially the bags on the filter screen) to avoid blocking the air inlet.

Name and Specification of Components

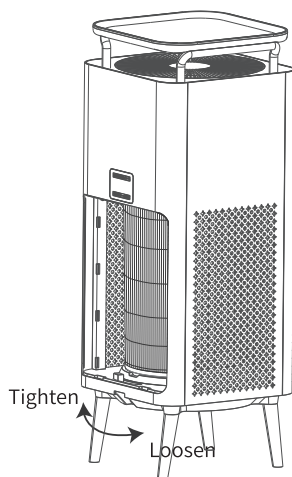

Product model	AIR-8001
Voltage	AC 100V-240V
Power	43W
Rated frequency	50~60Hz
CADR	520m ³ /h
Noise	34dB(A)~65dB(A)
Product dimension	290*290*800mm
Net weight	7kg

Operation Guidance

Power-on operation

When the machine is supplied with power, the product will give a “beep” sound, all the indicator lights will be turned on and then turned off, and the air purifier will enter standby status.

ON/OFF

Click the switch button (⏻) on the top of the machine to turn the machine on or off. It runs in the automatic mode by default when it is turned on, and the PM2.5 number displays "- - -". The light circle flashes green, orange, and red for 30 seconds and then displays the PM2.5 value.

Air quality display

After the power is turned on, the air quality light circle will change according to the air quality (green light is excellent/orange light is good/red light is poor). Screen **888** displays the PM2.5 value.

MODE

Touch the MODE button to select the machine to run in automatic mode or sleep mode.

AUTO:The machine will automatically adjust the air volume according to the air quality.

SLEEP:The machine runs at low speed and all lights except the sleep indicator light are turned off.

SPEED

When the machine is in other mode, the speed can be adjusted manually by pressing the Speed key. The air speed mode is set to run at three speeds.

TIMER

Press the "Timer" button to select the timing shutdown time, the timing mode is 1h, 2h, 3h, 4h. 12h, automatically shut down when the time is up.

WiFi

In the power on state, the WIFI button light is always on, press and hold the "WiFi" button for 5 seconds to enter the WIFI link mode, when the WIFI connection is successful, the WIFI button light will return to steady state.

For first time use, please refer to WiFi connection on page 07.

Reset Filter

When the air quality display light ring keeps flashing red, the user should replace the air filter with a new one, and then press the wind SPEED button + TIMER button at the same time until the red light ring stops flashing to reset the accumulated time.

WiFi connection

WiFi

一、Install Tuya APP

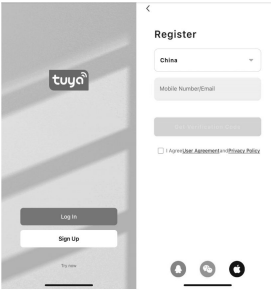

Scan the QR code of the product, or search for "Tuya Smart" in the app store, download and install the Tuya Smart APP, and users who have installed the Tuya Smart APP will be directed to the device connection page.

Product QR code

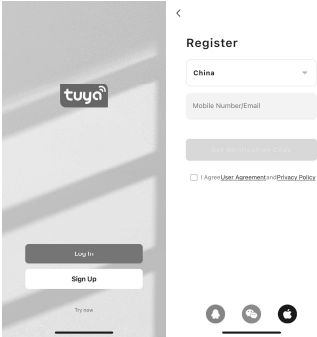

二、Register an account

1. Click "Register", and the privacy policy page of Tuya Smart Platform will pop up. After reading and agreeing, you will enter the account registration page.

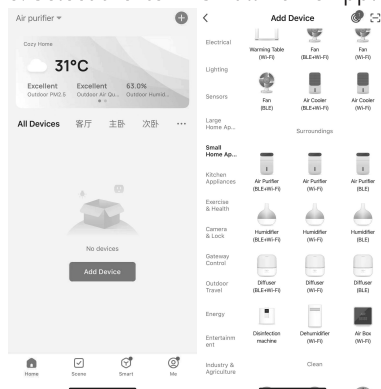

2. You can register with your email or mobile phone number. The country/region will follow the settings of the mobile phone system. You can also manually change the country/region (the country/region cannot be changed after the registration is completed). After entering your mobile phone number or email, click "Get Verification Code".

3. After entering the received verification code, it will jump to the setting password page. After setting the password according to the prompt below, click "Finish" to complete the registration.

If you are not clear about the process of network distribution, you can click the option "Light is not flashing" to check.
5. When the addition is successful, click on the APP home page to operate the air purifier function on the APP.

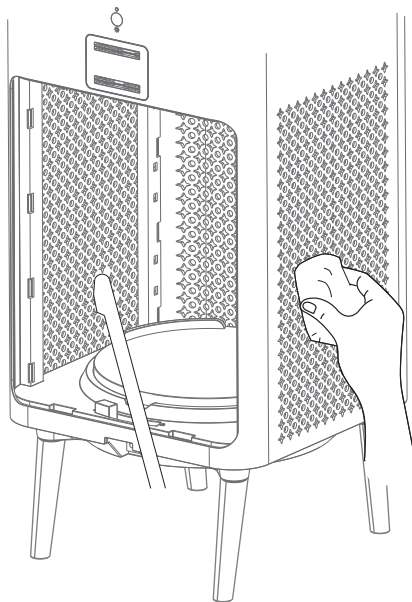

Remote control

Remote control

Cleaning for air inlet mesh

After the machine is used for a period of time, to ensure the ventilation and purification effect, you can use the vacuum cleaner to clean the dust on the air inlet, or gently wipe it with soft cloth.

Common Troubleshooting

Confirmation before Failure Declaration

Before entrusting the customer service center to repair the product due to abnormality, please confirm the following items firstly.

Common faults	Items for confirmation	Adopted measures
Product cannot be started	Is the rear cover closed?	Please close the rear cover and try again.
	Please check whether the power plugs are correctly connected?	Please connect power and start it again.
Product cannot discharge air	Please check whether the plastic bags on the filter screen of the purifier is removed.	Restart the machine after confirming that the plastic bags are removed.
	Is there anything blocking the air outlet above the purifier, which will affect the operation of the purifier?	If there is something blocking the outlet, remove the object from the air outlet.
Too loud sound	Have all the packaging materials been removed from the filter ?	Please ensure that all the packaging materials have been removed.
Air quality indicator light has always been red.	Is there any undetected dust or induced substances for peculiar smell?	Please move the machine to a clean room. If the red light is still ON, the sensor circuit may be abnormal. In this case, please consult the customer service center.
Air quality indicator light is red/orange/green, but the air volume is still the same.	Is the machine in auto mode status?	Please set to auto mode. In manual air speed mode, the air volume will not be changed automatically.
