Installation/Usage Instructions

Content Suggestions: Installation instructions should typically include information about spare parts, whether specific skills or tools are required for assembly or installation, etc. Instructions for use should typically include information about usage restrictions, personal protective equipment requirements (e.g., whether protective equipment is required, what type of protective equipment is required, etc.).

Taking a regular electric blanket product as an example:
1. Installation/Usage Instructions:
(1) Product Introduction: The instruction manual for the electric blanket should state whether the product is an outer blanket or an inner blanket;
(2) Usage Instructions: The instruction manual for the electric blanket should state that if the device is used at a higher control temperature, it may cause skin burns or heatstroke to the user.

Safety Information Instructions

Content suggestion: Safety information includes all the information needed to safely use the product, so that consumers can safely assemble, operate, store, maintain, and dispose of the product. This typically includes special storage instructions, warning information, maintenance and care instructions, cleaning instructions, and other information.

Taking an ordinary electric blanket as an example:
1. Safety information description
(1) Warning information: Do not use when wet;
(2) Special storage instructions: When storing this product, it should be folded after it has cooled down;
(3) Maintenance and care instructions: Regularly check the product for signs of wear or damage;
(4) Cleaning instructions: For electric blankets with non-removable wires, the instructions should state that the switch or control device must not be wetted during cleaning, and the position of the wires must ensure that water does not flow into the switch or control device during drying.
