

Description

Tork Heavy-Duty Cleaning Cloth is a reusable, strong and absorbent multipurpose cloth especially for janitorial and industrial cleaning applications. This wiper can be used in either the Tork Floor or Wall Stand dispensers, which are designed for safety, efficiency and reliability. With the easy load and tear off features - you can dispense the amount of material needed with one hand. Compatible with most chemical solvents: Picks up and releases solvents more efficiently than textile products which reduces consumption. Heavy-Duty nonwoven - designed to protect your hands from heat and metal scraps. Reusable, strong, durable wiper. Excellent rental towel and rag replacement. exelCLEAN™ technology for a fast professional cleaning result.

- Its strong texture and high absorbency makes it ideal for removing oil, grease, lubricants and dirt
- Its strong texture and thickness delivers some protection for workers hands from heat and sharp objects

Environmental Information

Raw materials	Cellulose pulp Polyester Polypropylene Functional agents or additives
Cellulose Pulp	Cellulose pulp is produced either from softwood or hardwood coming from responsibly managed forests. The wood chips are boiled together with chemicals to remove the lignin between the fibers. The pulp is TCF (Totally Chlorine Free) or ECF (Elementary Chlorine Free) bleached in order to achieve a clean, bright and strong product, but also to increase the hygienic and absorbent qualities.
Polyester	Polyester fiber is produced from terephthalic acid and ethylene glycol, which react through condensation to polyester resin. The molten resin is spun to fibers through spinnerets and cooled with air. The fibers are then cut to intended fiber length.
Polypropylene	Polypropylene or polypropene is a thermoplastic polymer made from oil. The moten resin is spun to endless fibers through spinnerets and cooled by air. The fibers form a web.
Functional agents and additives	Functional additives could be wet strength agent, antistatic agent and wetting additives /tensides.
Packaging	Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes
Article creation date and latest article revision	Date of issue: 02-06-2020 Revision date: 03-07-2025
Production	This product is produced at Suameer - NL mill.
Disposal/destruction of used product	This product is mainly used for industrial processes. When used in industrial processes the product might through use be contaminated with different substances. This will determine how the used product will be handled/disposed of/destroyed. The product itself is suitable for incineration. If used in industrial processes contact local authorities before destruction.
