

# HEAT WAND

MODEL WT-250

sealersales

Value Solution for Irregular Sealing

- 10" heated bar
- Ideal for sealing irregular packages
- Economically priced unit
- Optional 12" working mat is available

The **WT-250 Portable Sealer** is well suited for sealing irregularly shaped items, thanks to its direct-heat, flat sealing bar measuring approximately 10" x 1.5". Because this is a direct-heat sealer, the heated bar can be used on a wide range of materials, including coated aluminum foil, poly cello films, coated Kraft papers, waxed paper, cellophane, Mylar, coated polypropylene (PP), and other thicker materials. **This unit is not recommended for sealing polyethylene.**

The WT-250 is constructed with a durable metal body and features an insulated wooden handgrip for safer handling during operation.

#### Safety Note:

Do not touch the heating bar until it has fully cooled. An optional insulated mat (Part #HW-13) is available for added protection and convenience when using the WT-250.

#### Easy Operation:

Depending on the material being sealed, allow 5–15 minutes of warm-up time for the sealer to reach the desired operating temperature.

SPECIFICATIONS	WT-250
POWER	110V
POWER CORD LENGTH	5-FT
HANDLE LENGTH	6.2"
HEADING BLADE DIMENSIONS	10"L X 1.5"W X 3MM
TEMPERATURE	350°F
RUBBER MAT (OPTIONAL)	12" X 12" (PART# HW-13)
DIMENSIONS	13" X 10" X 5"
WEIGHT	13-OZ
