If you need precision, speed, and versatility in your packaging line, the **SS-800C Gummed Tape Dispenser** is the electric water-activated tape machine built to keep up with demanding, high-volume operations. SS-800C can moisten, cut, and dispense gummed tape with the simple press of a button.

With three output modes – Manual, Manual Program, Auto Program – your team can enter exact tape lengths on the fly, store up to 9 box presets for instant recall, or automatically dispense different preset tape lengths. The SS-800C offers a large moistening brush with variable water levels and adjustable pressure plate guaranteeing optimal tape moistening for secure carton sealing.
