Safe storage and quick overview

The tools sit securely in the foam thanks to precise contour cutouts, but are easy to remove. The carefully designed arrangement of the tools ensures space-saving storage and quick access to each tool.

Two-coloured foam insert

After removing the tool the light grey second foam becomes visible and therefore missing tools are quickly identified.

Individually tested

Safe working at voltages up to 1,000 V is guaranteed as all tools are individually tested at 10,000 V as per IEC 60900.

Fine-tooth design

The Zyklop VDE ratchet allows a short return angle of only 4.5 ° thanks to its 80 teeth.

For small spaces

The extremely slim design of the Zyklop VDE ratchet makes it easy to work, even in confined spaces.

Ball lock

The ball lock ensures sockets and accessories fit securely, providing increased safety during operation. A short press on the release button allows the tool to be changed quickly.

Switch lever

Switch lever for convenient change of direction.
