

UVEX

Envision Safety. MIL V₀ Ballistic Tested.

Working in Government and Police front-lines, extreme impact hazards such as chips, flying particles, material and metal fragments can pose a significant risk to the safety of your eyes. Uvex is created to solve your toughest challenges.

Renowned for its excellent protection, visibility, comfort and style, Uvex protective eyewear offers more: Military Velocity [MIL V₀] tested safety glasses for extreme impact protection.

To meet the new U.S. Military standard MIL-PRF-32432A – September 2018, the product must pass a variety of stringent tests. One of the most important is the test for impact. Compliant with ANSI and CSA 2015 standards, our Uvex protective glasses pass a ballistic resistance of a V₀ test using a 0.15 caliber projectile at a velocity of 700 to 725 feet per second [vs. the ANSI test – a ¼ inch diameter steel ball traveling at >150 feet/second.]

Uvex provides the same lightweight design, great comfort and excellent fit and style that the brand is recognized for, plus the added value of even greater protection against extreme impact.

Uvex has been an acknowledged leader in safety eyewear for more than fifty years. The pioneer of many groundbreaking innovations, Uvex is dedicated to protecting Government and Police personnel by meeting the highest level of eye safety standards.

CHOOSE THE UVEX MIL V₀-TESTED STYLE THAT BEST SUITS YOUR NEEDS!
