

EAN: 4013288225313

Part number: 05150113001

Article number: 9723

Size: 405x185x55 mm

Weight: 1492 g

Country of origin: CZ

Customs tariff number: 82079030

- Durable foam insert, each tool has its own place; two-coloured, missing tools will quickly be noticed
- High-quality, durable foam insert without chemical vapours
- Optimum fit for the best possible removal of the tools from the foam insert
- Water- and oil-repellent, low maintenance and easy to clean
- Protection of the tool from dirt and impact
- Bit socket (non-impact) for manual or power tool operations
- 10 bit sockets with holding function for TORX® screws, 11 bit sockets with holding function for hexagonal socket screws, one Zyklop connector with quick-release chuck for 1/4" bits
- With Take it easy tool finder: colour coding by size

Durable foam insert; two-coloured for quick identification of missing parts; suitable for the Tool Rebel roller cabinet; equipped with 21 Wera bit sockets, 3/8" and one Zyklop connector with quick-release chuck for 1/4" bits.

Safe storage and quick overview

The tools sit securely in the foam thanks to precise contour cutouts, but are easy to remove. The carefully designed arrangement of the tools ensures space-saving storage and quick access to each tool.

Two-coloured foam insert

After removing the tool the light grey second foam becomes visible and therefore missing tools are quickly identified.

Bit sockets with holding function for TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Camcar Innovations, Michigan, USA specifications are securely held on the tool!

Bit sockets with retaining function for hexagon socket screws

The clamping of the screw is achieved by a flexible locking ball. The holding function is especially helpful in confined, hard-to-reach spaces, where there is no room for a second hand to secure the screw.

Hex-Plus

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Take it easy tool finder system

Take it easy tool finder system - with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklus bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklus sockets and Zyklus bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklus bit sockets).
