Safely lever the tyres off of the rim

With the glass fibre reinforced plastic tyre levers, the tyres can be safely levered off the rim without damaging the rim. Lift off of the rim with one tyre jack, hook into a spoke and pull off the tyre with the second tyre jack. The two tyre jacks can be clicked together and are therefore not lost individually.

The tyre lever 9502 with bit mounting

The 1/4" hexagon mounting in the tyre lever 9502 allows mounting of a 1/4" bit. In this way, light screw connections can be conducted.

The tyre lever 9503

The tyre lever 9503 can be used as a valve ejector for Sclaverand (French) valves and as a bleeder valve for car valves.

Set contents:

9502 Tyre jack with bit mounting, 105 mm

1x 105 mm

9503 Tyre jack with valve ejector, 105 mm

1x 105 mm
