- For recessed TORX® screws with securing pin
- TORX® bit with bore hole on the output side
- Tough for hard materials
- 1/4" hexagon drive (Wera connecting series 4)

Premium bits for TORX® B0 socket screws. TORX® B0 screws have a protruding pin in their drive profile. This prevents unauthorized loosening, as these screws cannot be operated with "normal" TORX® tools. Only special TORX® B0 tools have a bore which can mount the pin. Tough, for universal use. 1/4" hexagonal, suitable for holders as per DIN ISO 1173-F 6.3.

## TORX® with borehole (B0)

## Tough bits

TORX® tools with a borehole prevent the unauthorised unfastening of safety screws. The screws contain a pin that protrudes into the drive profile so that "normal" TORX® tools cannot be used. This pin fits into the borehole of TORX® B0 tools allowing safety screws to be unfastened.

Tough Wera bits prevent the tip from breaking prematurely. Z-bits usually are the bit for universal screwdriving applications.
