The "SLIDER" A Large Capacity Sliding Door Cabinet

Designed to provide convenient storage in areas with limited space.

Cabinets are assembled at the Factory with electric welding for strength and rigidity; and are shipped set up ready to use.

Shelves are welded in place at different intervals for efficient storage.

Each shelf has a fabricated stiffener welded to the underside for increased carrying capacity.

Plastic glides are attached at the Factory to elevate the bottom of the cabinet from making contact with the floor, and also easier to move for cleaning, etc.
