

The ONLY Filter
that eliminates
odors & VOCs* at the
molecular level.

Greentech

REIMAGINING INDOOR AIR

ODOGard®

Odor's Worst Enemy

Behold the power of ODOGard®, a safe, non-toxic solution proven to destroy odors in products you know, used in garbage bags and adult diapers. Now that same great odor-eliminating technology works for entire homes and buildings thanks to Greentech Filters with ODOGard.

Advanced Nanofiber Filter Technology

Greentech Filters feature innovative nanofiber technology, increasing the surface area of the filter material to capture more ultrafine dust and particles than other filters. Nanofiber filters have low air resistance, allowing more airflow and less energy consumption compared to traditional filters.

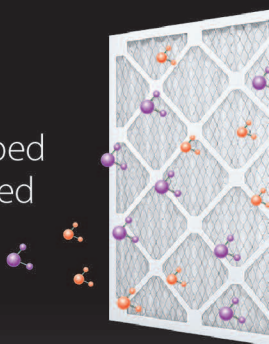

Nanofiber filter material measures 400x thinner than human hair, helping the filter maintain proper airflow over its lifetime.

How Our Filters Work

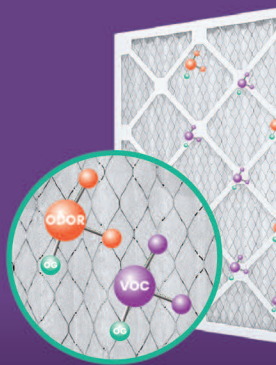

1 Capture

Odors and VOCs get trapped in our ODOGard-embedded Nanofiber Filters

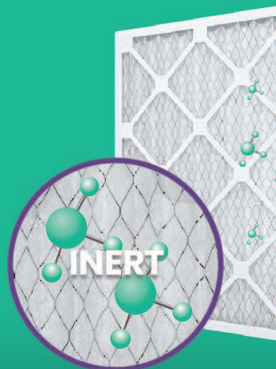

2 Bond

ODOGard permanently bonds with the VOC and Odor Molecules

3 Destroy

Odors and VOCs molecular structures are changed for good, leaving only fresh air.

Eco-Friendly Solution

Use Less, Save More.

Using Nanofiber Technology, our high-capacity filters are created with 50% LESS synthetic materials than other pleated filters, making Greentech Filters a very eco-friendly filter solution.

For every one 24" x 24" x 2" filter replaced with a Greentech Filter, the equivalent of 8+ (16.9oz) plastic bottles are saved from landfills, compared to traditional synthetic high-capacity filters. Feel good knowing your ecological footprint is smaller than before.

Perfect Filtration for:

Odors

VOCs

Pets

Biological

Dust/Mites

Mold

Pollen

Bacteria

Smoke

Chemicals

Why Greentech Filters?

- *Excellent filtration for tough environments (especially pet owners & smokers)*
- *Ultrafine filtration*
- *Captures small particulate matter like bacteria and virus carriers*
- *Removes troublesome allergens (pet dander, pollen, dust, mold)*
- *Filters gas phase & particulates*
- *Maintains MERV rating for the life of the filter*
- *Low-Pressure drop*
- *Less stress on HVAC system*
- *Most cost-effective way to improve air quality and eliminate odors*
- *Uses 50% less synthetic material than other filters*
- *100% Non-Toxic & Biodegradable*
- *Patented & Proprietary*
- *Made in the U.S.A.*
