12VAC MULTI-ZONE TRANSFORMER. PROGRAMMABLE & ON AT DUSK OFF AFTER 2/4/6/8Hr

The TR-TPC Series low-voltage transformers provide reliable power and intelligent control for 12VAC landscape lighting systems. Available in 200W models, these transformers feature dual-zone output control, allowing two lighting circuits to operate independently. A built-in photocell automatically activates lighting at dusk, while the integrated programmable timer turns lights off after 2, 4, 6, or 8 hours for energy savings. The durable wall-mount enclosure and simple push-button interface with LED indicators make installation and operation easy, making the TR-TPC series ideal for residential and commercial landscape lighting applications.

ELECTRICAL SPECIFICATIONS:

- Input Voltage: 120VAC
- Output Voltage: 12VAC
- Wattage Options: 200W
- Dual Zone Output Control
- Built-in Photocell for dusk activation
- Programmable timer: 2H / 4H / 6H / 8H run time after dusk

MECHANICAL SPECIFICATIONS:

- Finish: Black or stainless Steel
- Wall-mount enclosure
- Integrated control panel with LED indicators
- Push-button mode selector
- Dual mounting keyhole bracket

FEATURES

- Dual-zone control allows independent management of two lighting circuits
- Built-in photocell automatically turns lights on at dusk
- Programmable timer turns lights off after 2, 4, 6, or 8 hours
- Manual override modes: Off / On / Auto
- LED status indicators for easy programming & operation
- Weather-resistant outdoor enclosure for landscape lighting applications
- Ideal for gardens, pathways, architectural lighting, and outdoor accents
