PUMP SELECTION GUIDE (FOR PRESSURE TANK APPLICATION)

1. *Never select a pump based on the horse power (HP)!*
2. A pressure tank will reduce the pump's head significantly.
3. The key factor is the pumping level which is the static water level, not where the pump is in the well.
4. Read the chart below very carefully before you purchase a 3 HP pump.

3 HP pump when use a pressure tank

Pressure switch setting	Water (pumping) level is no deep than
Pump's Max rated Head	625 ft
20/40 psi setting	530 ft
30/50 psi setting	500 ft
40/60 psi setting	480 ft
