Quad-core 64-bit Cortex-A57

Integrated I/O

10GbE, SATA 6Gbps, PCIe lanes in 27 x 27 mm BGA size

AARCH64 arch.

Newly designed 64-bit instruction set for efficient process and energy saving

Higher performance

Enhanced floating point operations and 31 64-bit registers for reduced redundant data access

Cryptography

Operates with 128 bit SIMD registers for multiple encryption/decryption instructions per cycle

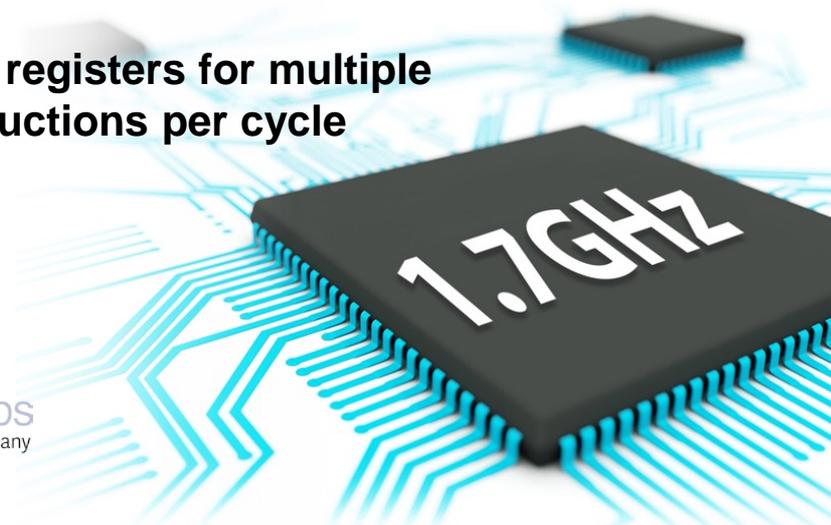

TS-832X

Two built-in 10GbE SFP+ ports

Fully support 10GbE high-speed networks, delivering a major speed increase for fast backup & restoration, large-data applications, and container application tasks.
