

# Security Kiosk Dual Stand

7-14 Inch Tablets

PAD-UATPB2

Rotate 360 Degrees for Portrait or Landscape Display

This versatile twin tablet kiosk stand offers style, security, and ease of use to your tablets, making it a perfect fit for retail points of sale, concierge desks, airport terminals, and more! Each of the two tablet holders is outfitted with a powerful lock and key security system, protecting your device from theft. For an optional measure of additional security, the stand also includes a galvanized steel security cable which attaches to either the back of one of the holders or the stand base, anchoring the stand to any permanent fixture at the other end. These unique, slide-adjustable tablet holders grip your tablet by its corners, tilting on a hinge and rotating 360 degrees for easy portrait or landscape orientations. This open design permits full access to your tablets ports, buttons, cameras, and headphone jack, for card reader compatibility. The central neck also rotates 360 degrees and accommodates charge cable routing through its hollow body. Also included are two styluses and elastic tethers, plus built-in holders on the stand base, which mounts to your tabletop, counter, or other flat surface with included hardware or adhesive padding.

## Features:
