

# Powering Better Patient Experiences

Luxor's KwikBoost® mobile device charging solutions help healthcare organizations enhance patient experience and satisfaction. Whether in a hospital room, waiting area, cafeteria, ER, or other common area, a KwikBoost courtesy charging station keeps patients and their loved ones powered up, connected, and informed.

## Patient Rooms

Access to charging is critical to keep people connected to their family and friends, especially in cases where the patient was admitted unexpectedly. KwikBoost's Mini Charging Hub keeps visitors and patients charged so your staff can focus on providing quality care, not on assisting with dead cell phones.

98%

of physicians and nurses use mobile devices as an integral part of their jobs.

94%

of patients use mobile devices during hospitalization for a variety of activities.

81%

of patients used personal devices to access their PHR during their stay.

## Waiting Rooms

Whether at a hospital, doctor's office, or medical clinic, KwikBoost's mobile device charging stations keeps patients connected while waiting. Adding Floor Stand Charging Stations, Wall Mounted Charging Stations, and Charging Lockers to common areas means that patients won't miss important calls or messages and can stay entertained.

## Physician's Lounges & On-Call Rooms

Lunch areas and break rooms give employees a place to take a mental and physical break from their jobs. But these spaces are an often overlooked feature of the workplace. Floor Stand Charging Stations, Mini Charging Hubs, and Charging Lockers keeps employee devices charged and boosts employee satisfaction and engagement.

## Advantages for Businesses

- Increases patient satisfaction and experience by keeping patients and their loved ones connected
- Helps prevent patients and visitors from using outlets designed for medical devices
- Keeps staff devices charged and ready for productivity
- Helps eliminate employee downtime related to depleted batteries
- Frees staff to focus on quality care, not assisting with dead cell phones
