

Powering Employee and Customer Experiences

Luxor's KwikBoost line of mobile device charging solutions helps companies improve employee and customer experiences. Whether it's in the reception area, break room, or a collaborative workspace, KwikBoost products elevate employee engagement and deliver a customer experience that makes companies stand out from the competition.

Conference Rooms and Collaborative Workspaces

Employees spend multiple hours every week in conference rooms and other collaborative workspaces meeting to work on business problems or projects. Mini Charging Hubs in these spaces promotes easy collaboration that improves productivity and efficiency.

Lobby and Reception Areas

Lobby and reception areas are high-traffic places where visitors and customers frequent every day. Providing Floor Stand and Wall Mounted Charging Stations as an amenity for your visitors improves the customer experience, all while increasing brand loyalty.

Lunch Areas and Break Rooms

Lunch areas and break rooms give employees a place to take a mental and physical break from their jobs. But these spaces are an often overlooked feature of the workplace. Floor Stand Charging Stations, Mini Charging Hubs, and Charging Lockers keeps employee devices charged and boosts employee satisfaction and engagement.

71%

of employees spend over two hours a week accessing company information on mobile.

60%

of employees use apps for work-related activity.

15%

average annual revenue growth rate of 'Experience-Driven Businesses' vs. other companies.

We purchased a KwikBoost charging station for our service center and absolutely love it, and so do our customers. Another fine example of American ingenuity, a great service to our customers, and a quality product. I have already recommended KwikBoost to several people.

-Sunland F.

Advantages for Businesses

- Keeps employee devices charged and ready for collaboration and problem-solving.
- Increases employee collaboration, engagement, and relationships.
