

MATERIAL

High-resilience polypropylene based (PP) technopolymer, coated with "soft-touch" thermoplastic elastomer (TPE) chemically bonded, hardness 70 Shore A, black colour, matte finish. Produced from FDA compliant raw material (FDA CFR.21 and EU 10/2011).

MAGNIFYING LENS

Transparent polyamide based (PA-T) technopolymer. Resistant to solvents, oils, greases, petrol and other chemical agents (avoid contact with alcohol). Press-fit assembly. It improves the visibility of the labels.

STANDARD EXECUTION

Plain blind hole.
The elastic coupling, by press-fit assembly on h9 tolerance drawn stock bars, is not affected by vibrations and prevents the handle from slipping off (see Technical data on page A-13).

ACCESSORIES ON REQUEST

Self-adhesive labels MA. (see page 469) with standard marks and symbols to be ordered separately.

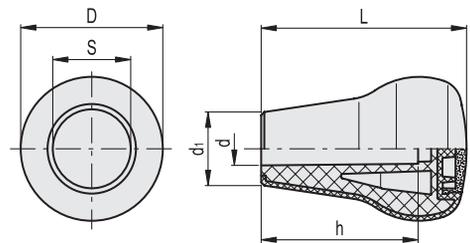

ASSEMBLY INSTRUCTIONS

1. See IEL.N SOFT
2. Stick the self-adhesive label (printed on the adhesive side) to the inner surface of the magnifying lens by pressing from the centre to the external side to avoid air bubbles. Assemble the magnifying lens to the handle face recess by gently tapping with a wooden or plastic mallet, until firmly in place. The label is therefore protected by the watertight magnifying lens.
