

# PERMA-PATCH®

PERMANENT PAVEMENT REPAIR

## INSTANT PERMANENT PAVEMENT REPAIR SOLUTIONS

### PRODUCT SELECTION GUIDE

#### REGULAR MIX

Perma-Patch Regular is our high-performing pavement repair product designed for general use in all weather conditions.

- Proven most durable for road and highway repair\*
- Flows easily with application in even the coldest conditions

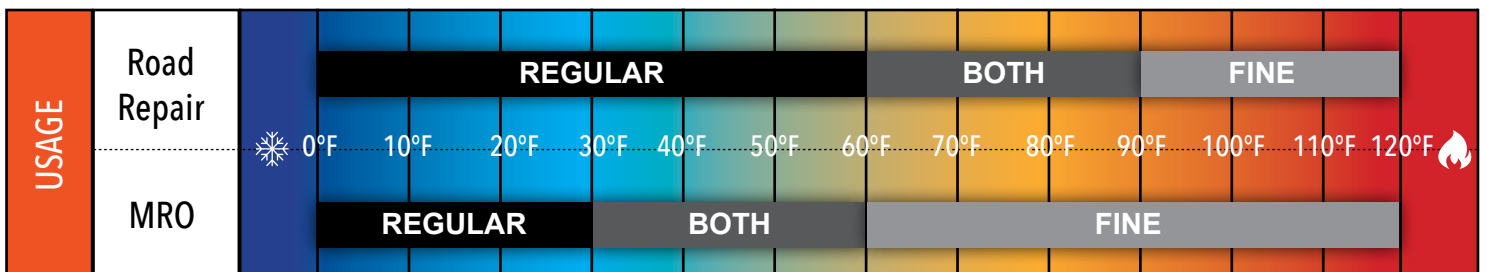

\* See Report SHRP-H-348 and -353 of the National Academy of Sciences "Strategic Highway Research Project", United States Federal Government Projects H105 and H106.

#### FINE MIX

Perma-Patch Fine Mix is specifically formulated for MRO applications and warm-climate road repair.

- Features finer aggregates enabling faster initial surface hardness with less compaction
- Stiffer at any given temperature versus our regular mix
- Excels in these maintenance and utility applications:
  - Low traffic areas such as parking lots
  - Shallow depressions
  - Sidewalk and ramp repairs
  - Cracks ¼ inch or wider

### CHOOSE THE OPTIMAL MIX FOR YOUR APPLICATION

Note: Chart displays ambient temperature

-  Parking lots
-  Sidewalks
-  Roads and Highways
-  Loading Ramps
-  Potholes
