HAND MASKING FILM

Hand Masking Film from IPG® is a pre-folded, high density polyethylene masking film designed for multiple paint applications such as marine, composites, bus, truck, specialty vehicle, automotive repair and home improvement. The thick and durable 12 micron film is treated to resist overspray flaking during multiple gelcoat applications. This special film is designed with a reinforced top edge formulated to prevent the underlying film from sticking.

PERFORMANCE ADVANTAGES

- Pre-folded masking film that prevents overspray and resists paint flaking
- Reinforced top edge to allow for easy dispensing and positioning of the film
- Stain resistant, temperature resistant and solvent resistant
- Static treated to cling to wall
- Comes in multiple sizes

CHECK OUT IRON GRIP'S FEATURE

SELF-FUSING SILICONE TAPE

IRON GRIP® Silicone Tape is a self-fusing, repair tape that conforms to any surface while providing a water-tight seal. Silicone Tape creates a chemical, moisture-resistant barrier that fixes leaky pipes, hoses and insulates frayed electrical wires. It is easy to remove, leaves no sticky residue and protects from corrosion. Ideal for marine, automotive, plumbing and household applications, plus many more!

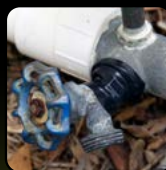

SEALS • PROTECTS • REPAIRS • INSULATES

- Insulates up to 8,000 volts
- 300% Stretch
- -85°F to 500°F
- 700 PSI

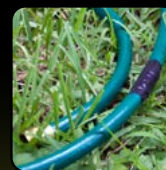

Repairs/insulates electrical wires

Repairs loose or leaky plumbing

Creates a firm grip on handle

Wrap hoses for an airtight seal

Sustainability Report

Sustainability is a key strategy for IPG. Our continuous improvement initiatives focus on a safe work environment, environmental stewardship, efficiency in raw material and energy usage, and good corporate citizenship forming the foundation for adopting the more holistic approach espoused by sustainability.

Embracing sustainability is one of the areas where we believe IPG can impact our employees, the communities where we live, our customers, including end-users of our products, our suppliers, and our shareholders.

Circular Economy Eliminating the concept of waste

Our Sustainable Product Design and Development Vision Statement directs the application of “safe and circular” concepts to our products’ design and development. We have committed to eliminating toxic substances from new and existing products and incorporating recycled and renewable materials while maintaining product performance. Achieving a circular economy is a long-term objective, but we are dedicated to working towards it.

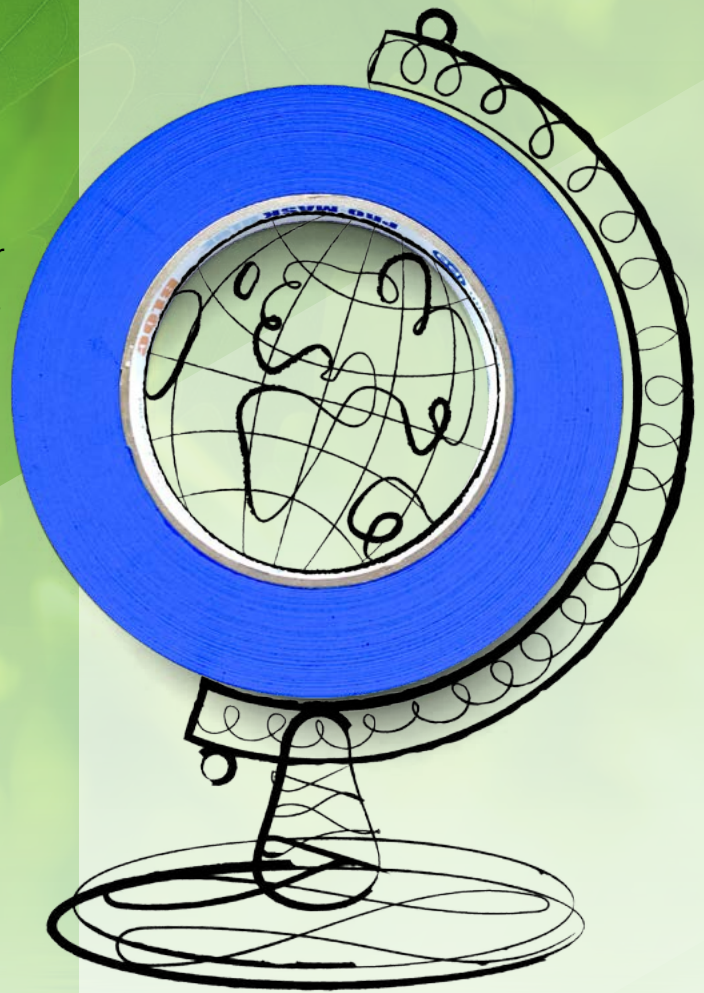

The Circular Economy emulates natural lifecycles, and eliminates the concept of waste so that all products and their components become “food” for other systems- either biological (returning to nature) or technical (returning to industry).

The planet faces significant challenges, from climate change to water quality and availability, to accumulating wastes in our environment. At IPG, we recognize these challenges, and we are confronting them. We have set goals to reduce water use, energy use, carbon emissions and improve our products’ environmental profile. We are actively working to redesign our products to reduce their footprint and achieve more circular manufacturing processes.

2020 Key Statistics

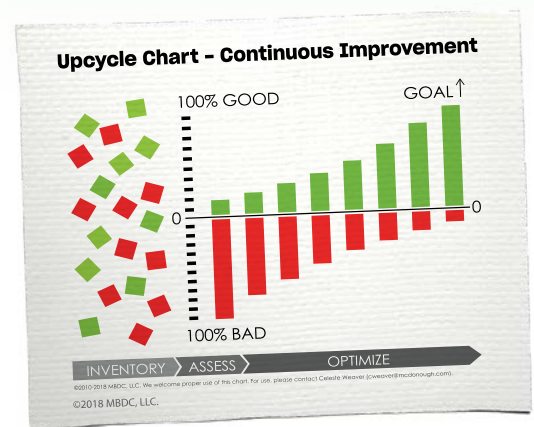

- EXCEEDED our goal to reduce energy intensity by 2.5% per year and CO2 emissions by 3% per year. Established in 2020 using 2019 at the baseline year, we have reduced our energy intensity by 7.16% and our CO2 emissions by 3.67%.
- REALIZED a 7.03% decrease in direct (Scope 1) emissions and a 1.95% decrease in indirect (Scope 2) emissions from 2019-2020.
- ACHIEVED a 2.79% reduction in carbon intensity in 2020 compared to 2019.

How2Recycle

Sustainable Packaging Coalition/How2Recycle®

In partnership with How2Recycle, IPG offers consumers information on the opportunities to recycle our products. How2Recycle is a voluntary, standardized labeling system that communicates recycling instructions to the public. At the end of 2020, a total of 10 IPG product lines have been approved to use the How2Recycle labeling system.

Answering the call for sustainable packaging alternatives, Curby® is IPG's line of curbside-friendly products. With E-commerce shipping volumes rapidly increasing and consumers becoming ever more aware of their environmental impact, IPG's curbside-friendly products are the logical next step in packaging. Curby products promote a circular economy and help answer these E-commerce growth challenges.
