

Zytron® 500 Chemical Protection Suit with Anti-Fog Visor

WPL922 Hood w/ Anti-Fog Faceshield, Gloves, Sock Boots w/ Flaps Attached, Zipper Front, 1 each

Top-of-class hazmat response suit is built for mobility and toughness with patented Zytron material and an industry-first anti-fog face shield with expanded view.

- Industry-first, patent-pending anti-fog visor provides a clear view and resists fogging far more effectively than standard suit face shields
- Large, expanded-view face shield increases field of vision with 17% more visor surface area; a "see better, work safer" improvement
- Suits show no permeation breakthrough after 8 hours of exposure to the ASTM F739-85/ASTM F1001-89 list of 15 hazardous chemicals and 6 gases
- Gas-tight Level A protection with front entry and expanded back
- Effective barrier against most organic and inorganic chemicals, including acids, bases, salts, greases and oils
- Fully encapsulating suit made from Zytron material withstands long-term contact with wet and dry chemicals
- Hot-air taped seams maximize strength and help prevent chemical penetration
- Entry point seals tight with gas-tight zipper and double storm flap with hook-and-loop closures
- Glove system includes field-replaceable Butyl gloves; hazmat styles include film liner glove
- Expanded back has plenty of room for air tank and full range of motion
- Available in Charcoal color or high-visibility Orange to stand out (identify sizes at a glance by ordering different colors for different sizes)
