

## PIG® Water-Activated Flood Bag

WTR009 Ideal For Stacking, Retaining Walls, 12" W x 24" L x 3.5" H When Fully Saturated, 10 per bag

Super absorbent flat bags swell up on contact with water to become a solid, heavy barrier to quickly dam and divert floodwater.

- Stack 26"-long sandbag replacements to create a retaining wall in flood-prone areas when water is coming
- Lightweight, compact and easy to handle before activated, unlike standard sandbags which are heavy, messy and labor-intensive
- Stack and stagger up to three rows high; build even higher retaining walls by using a pyramid layout
- NOTE: Not for use with salt water
