

YARD KING

installation instructions:

TERRACE LANDSCAPE EDGING

TOOL & MATERIAL CHECKLIST

- Shovel
- Mallet
- Rope / Nylon Line

IMPORTANT INFO

- If you place edging on grass, its dark color will attract heat and kill the underlying grass.
- Allow no more than 20 minutes on grass.

INSTALL INSTRUCTIONS:

1. PREPARING YOUR MATERIALS:

Make plastic edging easier to work with by laying the unrolled coil in the sun to warm, which will increase its flexibility.

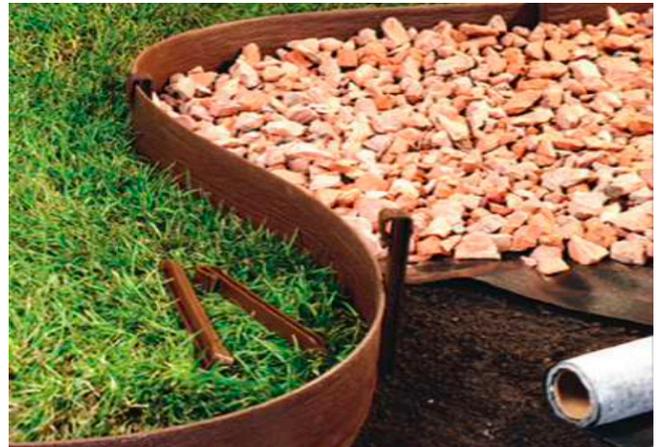

2. DIG YOUR TRENCH:

Use a rope or garden hose to lay out a line where you plan to install the edging. Trench approximately 4 in. to 5 in. depending on the type of edging and desired appearance.

3. INSTALL EDGING:

Use included stakes to secure edging on the inside of the landscape bed.

4. FILL BED:

With edging secure, fill inside of landscape bed with rocks, mulch, or other decorative materials.
