- **Great for storing and freezing applications**
- **Custom sizes and specifications accepted (Black, white, gold, silver, matte brown and more!!)**

More Details:

Our channeled vacuum pouches and rolls are designed for non-chamber vacuum machines. These bags and rolls have a special embossed surface which create channels for the air to be pulled directly from the pouch itself. Channel vacuum pouches will virtually stop oxygen from penetrating through the bags. Using a vacuum bag will significantly extend the life and flavor of your food, as well as prevent freezer burn and dehydration loss, eliminating waste.
