

Low profile value unit – ideal for heavy or large items

The **SM-101-DA Semi-Automatic Strapping Machine** is a general purpose strapping machine that can strap packages quickly and efficiently. The strapping machine is ideal for heavier items as the unit sits lower to the ground. Strapping cycle will automatically start when operator inserts strapping. The machine will automatically shut down after a preset time to save electricity. We recommend this machine for strapping cartons in a light industry setting.

Standard Features:

- Fast Warm Up Time (approx. five minutes)
- Control Panel to Adjust Reset and Manual Feed Buttons
- Tension Range Adjustment: 2-100lbs
- Low profile unit ideal for heavier items (max load: 66-lbs)
