SAVE THOUSANDS OF DOLLARS ON REPLACEMENT COSTS FROM DROPPED, BROKEN OR LOST DEVICES.

In an increasingly connected world, tablets have become as necessary a tool as any hammer, wrench, or drill. Teams need them to communicate effectively, but they also present the constant threat of a dropped object. Compounding the problem, is the replacement cost of a broken or missing tablet which can total up to \$1000 or more.

Problem Solved! The KEY-BAK PRO Tablet Jacket has been designed to fit almost any tablet and it's shock proof case while allowing full function of touch screen, forward/rear facing cameras, clear audio, and fingerprint readers. Includes built in adjustable hand straps. Don't replace a dropped and broken tablet, work safer AND get the job done with the NEW KEY-BAK PRO Tablet Jacket.
