NEW MODEL

- A. Wirebacked
- B. Die Cut
- C. Passes Appendix J
- D. Lower Average Pressure Drop

- A. Now featuring a wired back media, our pleated filters will prove to last longer with more strength and endurance.
- B. Another improvement we have implemented is our pleats' new die cut. This die cut allows the filter to have more support and frame strength guaranteeing it's durability, even through the dustiest months.
- C. Passing Appendix J means our pleats are now guaranteed to maintain their maximum efficiency through the duration of their change-out life span.
- D. With our new and improved Air Handler Pleats the average pressure drop is significantly lower which means saving energy and saving overall costs.
