Some Situations Demand Flexibility

Formatrac® Bendable Track

Baylor McKinney Medical Center

Introducing
Formatrac® Bendable Track

It's sustainable!

- A 99% recycled aluminum core and ABS (non-PVC) shell. This patented product provides a sustainable solution for your track needs.

- The ABS material complies with the Restriction of Hazardous Substances (RoHS) directive.

- The ABS material does not contain phthalates, PCBs (Polychlorinated Biphenyls) or PBTs (Persistent Biocumulative Toxins).

- We conducted a full HPD (Health Product Declaration) on Formatrac® in efforts towards transparency.

- In addition to being sustainable, Formatrac® is also Class A Fire Rated.

It's easy to ship and install!

- Standard track lengths allow for virtually any length or radius bend required and eliminates splicing.

- Easily cut on-site by hand.

- Simple installation by snapping track into grid clips.

- Versatility with virtually any ceiling type, including hard ceiling as well as tegular and flush ceiling tile.

- All four standard track lengths ship via UPS ground, not bulk freight.

- End caps don't have to be removed to add or remove carriers.

- Four standard track lengths: 8' (2.44m), 16' (4.88 m), 40' (12.19m) and 105' (32m) rolls.

It's quiet!

- Patented track and carriers slide quietly across track and have a peak load of over 50 lbs. (22 kg.).

- Independent testing has shown significant decibel reduction with Formatrac® vs standard aluminum track equating to over 50% reduction of noise.
