

Hospital Grade SmartlockPro® Slim GFCI Receptacles

Specification and Ordering Guide

- Shallow profile design is easier to install in all electrical boxes
- Same SmartlockPro® advantages you've come to rely on
- Sleek, flush appearance

Slim is in.

GFCI installation just became easier!

New Hospital Grade SmartlockPro® Slim GFCI Receptacles
Fit Right In and Look Great

- Standard Self-Ground Clip (Except Weather-Resistant Models)
- Dual Function Indicator Light
- Impact-Resistant Polyester Cover
- Leviton Patented Reset Lockout
- Tamper-Resistant Shutters (Where Stated)
- Terminal Screws and Clamps Withstand High Torque
- Back and Side Wire (External Back Wire Clamp)
- Slim Profile Provides 25% More Room in Wall Box

- Low-profile design is easy to install in all electrical boxes
- Saves time on the job
- Available in 15A and 20A versions, all with Fed Spec ratings

- Plus, all the advantages that have made SmartlockPro GFCIs a top brand, including reset lockout, dual function indicator light and superior noise immunity

Slim is in!

Industry-leading quality, professional grade lockout action, and one of the slimmest profiles on the market make Hospital Grade SmartlockPro Slim GFCIs the smartest choice in ground fault circuit interrupter protection. Faster and easier to install in any wallbox because depth is reduced, the slim GFCIs flush mount to the wall with minimal protrusion for a sleek, finished look.

The SmartlockPro® Protection Advantage

Patented Reset Lockout

The Reset Lockout feature provides an end-of-life indication and prevents reset if a SmartlockPro GFCI is damaged so that it cannot respond to a ground fault. Competitive GFCIs may allow reset even if they are no longer providing protection. The SmartlockPro RESET button will not engage if:

- The GFCI is miswired due to reversal of the line and load leads
 - Delivery of power to feed-through terminal and face will be blocked
- There is no power being supplied to the GFCI
- The GFCI cannot pass its internal test

LED Indicator for Line-Load Reversal*

If a SmartlockPro GFCI is miswired during installation (line-load reversal) it cannot be reset. The green LED will be ON to indicate a line-load reversal. Once the GFCI is properly wired and can be reset, the LED acts as a power indicator that remains ON as long as the GFCI is operating correctly and providing power. Unlike some other designs that employ a one-time feature, Leviton's line-load reversal protection is not lost or disabled after initial installation.

Other Features and Benefits

- Impact-resistant polyester cover and thermoplastic body extend service life
- Silver alloy contacts provide superior conductivity
- Patented bridge contact provides individual sets of contacts for GFCI receptacle face and downstream receptacles; no power will be delivered to receptacle face if improperly wired (line-load reversed)
- Trip threshold meets or exceeds UL requirements for tripping time
- Improved immunity to high frequency noise reduces nuisance tripping
- Advanced electronics provides superior resistance to electrical surges and over-voltages
- TEST and RESET button colors match device face
- Compatible with all Decora® devices and wall plates; available in select Decora colors
- Two-Year Limited Warranty

SmartlockPro Dual-Function LED Indicators*

	LED Indication	Reset Status	Reason
During initial installation	ON	Will not reset	Line and load leads are reversed
	OFF	Press RESET and LED comes ON	GFCI is wired and operating correctly
During normal operation	ON	GFCI is reset	Power is ON
	OFF	GFCI is Tripped	Power is OFF

*Self-test indicators may differ. Refer to instruction sheet.

Slim GFCI Duplex Receptacles

15 Amp & 20 Amp, 125 Volt

Features & Benefits:

- Automatically tests the GFCI every time the RESET button is pushed in
- The GFCI will not reset if its circuit is not functioning properly
- Blocks the RESET button if GFCI protection has been compromised, reducing the possibility of end-users incorrectly assuming that a reset GFCI is providing ground fault protection when it is not
- Patented bridge contact provides individual sets of contacts for GFCI receptacle face and downstream receptacles
- Trip threshold meets or exceeds UL requirements for tripping time
- Improved immunity to high frequency noise reduces nuisance tripping
- Advanced electronics provides superior resistance to electrical surges and over-voltages
- Silver alloy contacts
- Impact-resistant cover and body
- Expanded wiring options with external wiring clamps
- Dual function LED offers indication of line/load reversal and power availability
- One-piece T-design trip latch mechanism provides efficient operation
- TEST and RESET button colors match device face

Tamper-Resistant (TR)

- Comply with NEC® Section 517.18C mandating that all 15A and 20A receptacles installed in pediatric locations be listed as tamper-resistant
- Shutter mechanism inside the receptacle blocks access to the contacts unless a two-prong plug is inserted

NAFTA Compliant Slim GFCI Duplex Receptacles

15 Amp & 20 Amp, 125 Volt

Features & Benefits:

All the advantages that have made SmartlockPro GFCIs a top brand – including reset lockout, dual function indicator light and superior noise immunity – plus:

- NAFTA Compliant versions – suitable for installation in a wide range of environments where compliance with the Buy American Act is desirable
- Color-matched wallplate included

Tamper-Resistant (TR)

- Comply with NEC® Section 517.18C mandating that all 15A and 20A receptacles installed in pediatric locations be listed as tamper-resistant
- Shutter mechanism inside the receptacle blocks access to the contacts unless a two-prong plug is inserted

Self-Test & Guide Light Slim GFCI Duplex Receptacles

15 Amp & 20 Amp, 125 Volt

Features & Benefits:

All the advantages that have made SmartlockPro GFCIs a top brand – including reset lockout, dual function indicator light and superior noise immunity – plus:

Self-Test

- Automatically tests the GFCI every 15 minutes and alerts users if protection has been compromised (will not trip GFCI)
- Two indicator lights and an audible beep signal GFCI status

Tamper-Resistant (TR)

- Comply with NEC® Section 517.18C mandating that all 15A and 20A receptacles installed in pediatric locations be listed as tamper-resistant
- Shutter mechanism inside the receptacle blocks access to the contacts unless a two-prong plug is inserted

Guidelight

- Sensor provides automatic ON/OFF based on ambient lighting
- Dual lens provides visible light with a variety of plugs or transformers
- Custom designed lenses with edge-mounted LEDs improve light dispersion
- Energy-efficient - uses approximately 1-Watt of electricity (no bulbs to replace)
- Saves space by eliminating the need to use an outlet for a plug-in night light
- Wallplate not included

Weather-Resistant Slim GFCI Duplex Receptacles

15 Amp & 20 Amp, 125 Volt

Features & Benefits:

All the advantages that have made SmartlockPro GFCIs a top brand – including reset lockout, dual function indicator light and superior noise immunity – plus:

Weather-Resistant (WR)

- Designed for wet and damp locations to meet the requirements of NEC Section 406.8.
- Stainless steel strap and screws
- Conformal coated PC board to protect critical components from moisture
- Cold impact resistant face and buttons
- UV stabilized plastics

Tamper-Resistant (TR)

- Comply with NEC® Section 517.18C mandating that all 15A and 20A receptacles installed in pediatric locations be listed as tamper-resistant
- Shutter mechanism inside the receptacle blocks access to the contacts unless a two-prong plug is inserted
