Description

This product is a water-based formula used for polishing stainless steel, chrome, copper, aluminum, brass, and other metal surfaces. It is a water-in-oil emulsion, where the oil surrounds the water and contacts the surface to be cleaned first. This allows the product to act like a solvent (oil-based) system while not having its oiliness or flammability. This pleasantly fragranced product cuts through grease and oil while leaving a protective shine.
