## Rittal Corporation – Stainless Steel HMI Enclosures

Rittal's HMI systems allow an operator's interactions with machines to be handled with precision and ease. Based on the proven AE line of wallmount enclosures, Rittal Consolet enclosures are NEMA 12/13 individual desk units designed for use indoor to meet the requirements of most operator interface applications. Control components such as meters, push buttons, pilot lights, flat panels and switches can be mounted on the easily removable top-hinged control panel that slants 30 or 60 degrees.
