

**The reliability you demand.  
The durability you deserve.**

As a company with a long and distinguished line of product innovations, Red Devil Equipment is continually refining our product line to reflect the current needs of our customers. As a result, the new Air Devil is our answer to those across the country that require a reliable pneumatic shaker for their day-to-day operations.

By incorporating a heavy duty air cylinder and sealed ball bearings, the Air Devil is designed to eliminate the friction and wear commonly associated with competing models.

- Standard in-line air filter prevents debris or moisture from reaching internal components
- Designed with an oversized air cylinder to reduce wear
- Requires airflow of 70-135 PSI (3.2 SCFM)
- Heavy duty ball bearings are permanently sealed eliminating the need to grease the zerk fittings
- Shakes a variety of containers of all sizes and shapes ranging from 3<sup>1/4</sup> to 11 inches in height and up to 6<sup>3/4</sup> inches in diameter

**AIR DEVIL BASE (REQUIRED FOR USE)**

- Pedestal Base allows you to place your Air Devil at counter height
- Bolts to the floor for extreme stability when operating
- Fits onto existing bases of comparable models

**Heavy Duty Permanently Sealed Ball Bearings For Increased Longevity**
