# Kilowatt

Get 'charged up' with the SOG Kilowatt, the first working theme knife designed for electricians, homeowners, contractors, or anyone who might need to strip wire in a pinch. Three separate systems address wire from fine multi strand all the way up to cable. There is a stripper bar for wires from 12-24 AWG, an adjustable spring-

loaded UTP/wire stripper in the back, and our patent pending hole stripper that utilizes the main blade. Schematic grips, Hi-Voltage tower clip, insulator thumb stud, and a blade with receptacle engraving are signatures that make this a very unique liner lock knife. Without the Kilowatt... you just might end up in the dark.

## Key Selling Features:

- Blade: AUS-8 stainless steel  
Straight edge, clip point  
Satin polish finish
- Glass-reinforced nylon (GRN) handle
