

STI Stopper[®] Seal

STI-6515

PRODUCT OVERVIEW

Simple and low cost, Stopper Seal provides an added level of security when used with STI devices with a warning horn and those without. Available for STI protective covers, it consists of a frame lock and breakaway plastic seal that must be broken to lift the protective cover and gain access to the protected emergency shut-off button, manual pull station, on/off switch, keypad, etc.

NOTE: Cannot be used for fire alarm emergency or emergency life safety units without approval from local AHJ.

FEATURES

- Used with the cover to protect keypad, on/off switch, emergency shut-off button, etc.
- Helps prevent frivolous use because most people are reluctant to break anything.
- Adds another level of security.
- Extremely simple and inexpensive.
- Factory installation available upon request.
