SAFE® GLOW

High-performance Photoluminescent Exit Signs

Safe Glow® exit signs feature handsome looks and industry leading photoluminescent performance. All **Safe Glow** exit signs are UL listed (35JP) to meet the requirements of UL 924, and meet all current NFPA and IBC code requirements. Non-electrical performance allows them to charge with ambient light. *To charge, a minimum of 5 foot-candles of unfiltered fluorescent light on the face of the sign is reqired at all times of building occupancy.*

5 Reasons Safe Glow's High Performance Photoluminescent Exit Signs Are Your Best Choice

• No electricity, No batteries, No maintenance, and No required annual testing

• UL 924 listing meets NFPA and IBC codes nationwide

• More photoluminescence and brighter performance for higher life safety

• Manufactured with quality components to ensure the highest photoluminescent performance

• Attractive design for any interiors, designed to stay that way over a 25 year life

Features:
- Meets all current building codes for high or low-level installation
- Non-radioactive and non-toxic
- Uses no electricity or batteries
- Charges using ambient light
- Glows for more than 12 hours
- No replacement parts or maintenance
- Minimizes time required for annual testing
- Average savings over LED exit signs is $50 per sign, per year
- Easy installation
- In new construction, eliminates wiring, conduit, circuit breakers, and minimizes contractor costs for installation
- LEED points available

Specifications:
- UL 924 listed and meets UL 1994 performance guidelines
- Designed for indoor use
- Projected operating life - 25 years
- Warranty - 5 year limited warranty
