| Chemical Formula | C <sub>28</sub> H <sub>31</sub> ClN <sub>2</sub> O <sub>3</sub> |                                                                                                                                                                          |                                                                       |
| CAS Number       | 81-88-9                                                         | <div><div></div><div>In case of<br/>Emergency<br/>Call</div><div><b>Chemtrec®</b><br/><b>(800) 424-9300 (U.S.)</b><br/><b>(703) 527-3887 (International)</b></div></div> |                                                                       |

## Section II. Composition and Information on Ingredients

| Chemical Name | CAS Number | Percent (%)      | TLV/PEL                                                                                                       | Toxicology Data                                                                                                                            |
|---------------|------------|------------------|---------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Rhodamine B   | 81-88-9    | Min, 95.0 (HPLC) | This chemical is classified as a possible carcinogen. There is no acceptable exposure limit for a carcinogen. | Rat LD <sub>50</sub> (intravenous) 89 mg/kg<br>Rat LD <sub>50</sub> (intraperitoneal) 112 mg/kg<br>Mouse LD <sub>50</sub> (oral) 887 mg/kg |

## Section III. Hazards Identification

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acute Health Effects   | Harmful if ingested or inhaled. Minimize exposure to this material. Severe overexposure can result in injury or death. Follow safe industrial hygiene practices and always wear proper protective equipment when handling this compound.                                                                                                                                                                                                                                                                                                                                                                                 |
| Chronic Health Effects | <b>CARCINOGENIC EFFECTS</b> : Equivocal tumorigenic agent by RTECS criteria.<br><b>MUTAGENIC EFFECTS</b> : Not available.<br><b>TERATOGENIC EFFECTS</b> : Tumorigenic Effects.<br>Rat TDLo Subcutaneous 3600 mg/kg/68 weeks intermittent<br>TOXIC Effects:<br>Tumorigenic - Equivocal tumorigenic agent by RTECS criteria<br>Blood - Lymphomas including Hodgkin's disease<br>Tumorigenic - Tumors at site of application<br><b>DEVELOPMENTAL TOXICITY</b> : Reproductive Effects.<br>Mouse TDLo Intraperitoneal 60 mg/kg, female 7-10 days of pregnancy.<br>TOXIC Effects:<br>Effects on Embryo or Fetus - Fetotoxicity |

## Section IV. First Aid Measures

|              |                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye Contact  | Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention.                                                                                                                                                                                                                                                                                                |
| Skin Contact | In case of contact, immediately flush skin with plenty of water. Remove contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention.                                                                                                                                                                                                                                                        |
| Inhalation   | If the victim is not breathing, perform mouth-to-mouth resuscitation. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, oxygen can be administered. Seek medical attention if respiration problems do not improve.                                                                                                                                                                                             |
| Ingestion    | INDUCE VOMITING by sticking finger in throat. Lower the head so that the vomit will not reenter the mouth and throat. Loosen tight clothing such as a collar, tie, belt or waistband. If the victim is not breathing, perform mouth-to-mouth resuscitation. Examine the lips and mouth to ascertain whether the tissues are damaged, a possible indication that the toxic material was ingested; the absence of such signs, however, is not conclusive. |

## Section V. Fire and Explosion Data

|                                      |                                                                                                                                                                                                        |                  |                |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|----------------|
| Flammability                         | May be combustible at high temperature.                                                                                                                                                                | Auto-Ignition    | Not available. |
| Flash Points                         | Not available.                                                                                                                                                                                         | Flammable Limits | Not available. |
| Combustion Products                  | These products are toxic carbon oxides (CO, CO <sub>2</sub> ), nitrogen oxides (NO, NO <sub>2</sub> ), halogenated compounds.<br>WARNING: Highly toxic HCl gas is produced during combustion.          |                  |                |
| Fire Hazards                         | Not available.                                                                                                                                                                                         |                  |                |
| Explosion Hazards                    | Risks of explosion of the product in presence of mechanical impact: Not available.<br>Risks of explosion of the product in presence of static discharge: Not available.                                |                  |                |
| Fire Fighting Media and Instructions | SMALL FIRE: Use DRY chemical powder.<br>LARGE FIRE: Use water spray, fog or foam. DO NOT use water jet.<br>Consult with local fire authorities before attempting large scale fire-fighting operations. |                  |                |

Emergency phone number (800) 424-9300

**Section VI. Accidental Release Measures**

|                            |                                                                                                                                                                                                                                                                                                                                             |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Spill Cleanup Instructions | Harmful material. Possibly carcinogenic material. Possibly Sensitizing Material.<br>Use a shovel to put the material into a convenient waste disposal container. Finish cleaning the spill by rinsing any contaminated surfaces with copious amounts of water. Consult federal, state, and/or local authorities for assistance on disposal. |
|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Section VII. Handling and Storage**

|                                  |                                                                                                                                                                                                                                                                                                                                      |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Handling and Storage Information | HARMFUL. POSSIBLE CARCINOGEN. POSSIBLE SENSITIZER. Keep away from heat. Mechanical exhaust required. When not in use, tightly seal the container and store in a dry, cool place. Avoid excessive heat and light. Do not breathe dust. Always store away from incompatible compounds such as oxidizing agents, combustible materials. |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Section VIII. Exposure Controls/Personal Protection**

|                      |                                                                                                                                                                                                                                                                                 |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Engineering Controls | Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit. |
| Personal Protection  | Splash goggles. Lab coat. Dust respirator. Boots. Gloves. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product. Be sure to use a MSHA/NIOSH approved respirator or equivalent.                                              |
|                      |                                                                                                                                                                                                |
| Exposure Limits      | This chemical is classified as a possible carcinogen. There is no acceptable exposure limit for a carcinogen.                                                                                                                                                                   |

**Section IX. Physical and Chemical Properties**

| Ecotoxicity        | Not available. |
| Environmental Fate | Not available. |

**Section XIII. Disposal Considerations**

|                |                                                                                                                                                                                                                                                                                                                         |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste Disposal | Recycle to process, if possible. Consult your local regional authorities. You may be able to dissolve or mix material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber system. Observe all federal, state and local regulations when disposing of the substance. |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Section XIV. Transport Information**

|                      |                                                                                   |

**Notice to Reader**

TCI laboratory chemicals are for research purposes only and are NOT intended for use as drugs, food additives, households, or pesticides. The information herein is believed to be correct, but does not claim to be all inclusive and should be used only as a guide. Neither the above named supplier nor any of its subsidiaries assumes any liability whatsoever for the accuracy or completeness of the information contained herein. Final determination of suitability of any material is the sole responsibility of the user. All chemical reagents must be handled with the recognition that their chemical, physiological, toxicological, and hazardous properties have not been fully investigated or determined. All chemical reagents should be handled only by individuals who are familiar with their potential hazards and who have been fully trained in proper safety, laboratory, and chemical handling procedures. Although certain hazards are described herein, we can not guarantee that these are the only hazards which exist. Our MSDS sheets are based only on data available at the time of shipping and are subject to change without notice as new information is obtained. Avoid long storage periods since the product is subject to degradation with age and may become more dangerous or hazardous. It is the responsibility of the user to request updated MSDS sheets for products that are stored for extended periods. Disposal of unused product must be undertaken by qualified personnel who are knowledgeable in all applicable regulations and follow all pertinent safety precautions including the use of appropriate protective equipment (e.g. protective goggles, protective clothing, breathing equipment, facial mask, fume hood). For proper handling and disposal, always comply with federal, state, and local regulations.
