Volt® Mesh
Seating

MORE STYLE, MORE SUBSTANCE - ALL FOR LESS.

Volt mesh seating offers a unique combination of style, scale, comfort and functionality. Its real value is in its flexibility, with the ability to work in virtually any environment. The larger seat and back provide maximum comfort, and results in a more comfortable reclining position with better support.

Comfort and function at your fingertips

- Wide seat & contoured back.** Provide all-day comfort allowing greater productivity.
- Pneumatic lift.** Raises and lowers chair to achieve best relationship to work surface. Proper seat height reduces pressure on legs and improves circulation.
- 360° swivel.** Swivels over the base, allowing user to remain seated while retrieving items from the active work zone.
- Tilt.** Adjusts seat and back to a reclined position for all-day comfort. Pivot point located above center of chair base.
- Synchro-tilt.** Allows the back to recline twice as fast as the seat. As the back reclines, the seat remains relatively level, promoting leg circulation and ergonomic function.
- Tilt tension.** Adjusts the amount of resistance when reclining to accommodate individual weight and work styles.
- Tilt lock.** Locks the chair in an upright position for constant back support when not reclining.
- Optional adjustable height arms.** Raises and lowers arms, reducing shoulder, neck and back strain.
- Extended height.** Offers the functional flexibility to accommodate workers in the standing-height workstations, high tables and counters.
