### Weather Resistant Protective Film

## Metal Protectant

This unique, ready-to-use liquid dries to form a transparent, wax-type protective film of approximately 1 mm thick. Use indoors or outdoors, on either ferrous or non-ferrous metal surfaces, for long-term protection.

#### Benefits:

- Impenetrable film barrier protects against corrosion, even in severe outdoor applications
- Protects outdoor surfaces for up to two years and indoor surfaces indefinitely
- Electrical Resistance similar to polyethylene
- Dried film does not support combustion
- Easily removable with a safety solvent or emulsifiable solvent degreaser when desired

#### Applications:

- Building contractors
- Electrical contractors
- Electrical equipment
- Fabricated metal shops
- Industrial machinery manufacturers
- Manufacturing plants
- Marine products
- Motor vehicle body manufacturers
- Railroads

**Directions for Use:** Clean surfaces of all dirt, grease and loose rust. Mix product thoroughly before use. Product can be applied by spraying, dipping or brushing although application by brush may tend to leave brush marks. Apply by using a pump-type sprayer or a spray gun. Apply a smooth, thin, even coating for protection for up to six months outdoors or one year indoors. Spray additional or heavier coats for added protection for up to 2 years outdoors or indoors indefinitely (see product label for specifics). For additional protection, allow to dry and then recoat. Drying time is 1 to 2 hours under normal conditions. Remove film with a Zep industrial degreaser before painting surface.

Base Code: R233

### Companion Products:

	Base Code
Aerosol Rust Preventer.....	R228
Rust Converter .....	R234
