

ARMORWRAP

RUST PREVENTION VCI PAPER

WRAP OUT RUST

Wrap out rust with ARMOR WRAP® – a VCI paper specifically designed to keep ferrous and non-ferrous metals corrosion free. We combine ARMOR VCI Nanotechnology™ (a.k.a., our “secret recipe” for vapor corrosion inhibitor) with neutral pH Kraft paper to create rust-prevention packaging that is effective, reliable and worth its weight in gold: ARMOR WRAP VCI paper.

You don't have to get dirty to keep your metal parts clean. Wipe away the mess and hassle of oil- and grease-based RPs with ARMOR WRAP VCI paper – it's clean, dry and easy to apply. Simply wrap or enclose metal parts in ARMOR WRAP and the VCI releases protective vapors that form a shield of protection on the surface of metal, displacing moisture and repelling rust. Better yet, ARMOR WRAP has VCI on BOTH sides of the paper (unlike the one-sided format used by most VCI companies) to ensure that it is virtually goofproof to apply.

ARMOR WRAP BENEFITS

- **EASY-TO-USE:** VCI coating on both sides of paper simplifies application
- **CONTINUOUS PROTECTION:** provides up to 3 years standard protection
- **SAFE:** rust prevention free of oils, solvents or other harsh chemicals
- **SUSTAINABLE:** recyclable, repulpable, and made from renewable sources
- **CLEAN:** leaves no oily, sticky, or greasy residue
- **BIODEGRADABLE:** all ARMOR WRAP is biodegradable (excluding wax and poly-coated)
- **VERSATILE:** use alone or pair with other ARMOR VCI products for extended protection

TAKING THE WORK OUT OF YOUR WORKDAY

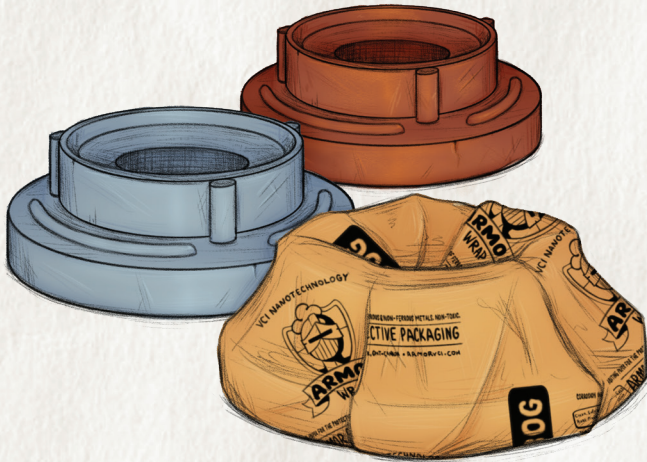

ARMORWRAP

RUST PREVENTION VCI PAPER

VCI PROTECTION THAT EARNS A GREEN THUMBS UP!

ARMOR WRAP VCI paper is recyclable, and you don't have to be an environmentalist to recognize that recycling is one of the best ways to positively impact the environment and our human race. Recycling reduces pollution from waste and conserves raw materials and the energy needed to produce and process them.

Additionally, ARMOR WRAP VCI papers are made from renewable resources, specifically wood—a natural material that can be planted, harvested, and replanted. In the US, advancements in papermaking technology and the use of renewable biomass have improved the sustainability of paper production.

All items on the Stock & Ready™ product list are in-stock and ready-to-ship with no order minimums.
