DIRECT HEAT SEALER FOOT OPERATED

KF-SERIES

sealersales

Seals Foil, Kraft & Mylar

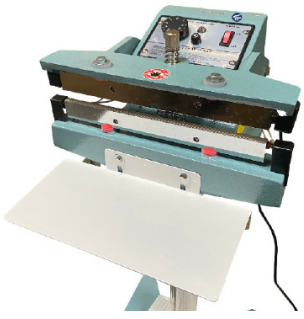

- **Easy to operate**
- **Seals a variety of thermoplastic materials**
- **Simple to use temperature controller**
- **Seal length: 8” (200mm), 12” (300mm), 16” (400mm)**
- **Seal width: 10mm /15mm**
- **Seal style: meshed**
- **Option: standing height operation**

Our **KF-Series Direct Heat Sealers** are a must-have for any business that needs to seal thick packaging materials such as coated aluminum foil, Kraft paper, cellophane, and coated PP. Please note that direct heat sealers cannot seal polyethylene. Depending on the model of the sealer, material up to 16” and 20 mil can be sealed. The sealer heats both jaws simultaneously, ensuring better heat penetration for a secure, reliable seal every time. Using the included adjustable work table makes it easier to position the bag between the seal jaws, improving overall control. Optional standing height (adds 10”) operation available upon request.

Easy to operate. Set the temperature controller depending on the material to be sealed. Please note the temperature setting is in Celsius not Fahrenheit. Once the correct setting has been reached consistent seals can be achieved each time.

Don’t let your business suffer from poorly sealed packaging - invest in a Sealer Sales KF-series direct heat sealer today!

SPECIFICATIONS	KF-200DF	KF-300DF	KF-400DF
SEALING LENGTH	8”	12”	16”
SEAL WIDTH	10MM	10MM	15MM
SEAL TYPE	MESHED	110V / 300W	110V /400W
POWER	250W	350W	420W
TEMP RANGE	50-300°C (122-572°F)	50-300°C (122-572°F)	50-200°C (122-392°F)
MAX SEAL THICKNESS	20MIL	20MIL	20MIL
DIMENSIONS	10” X 10” X 36”	14” X 10” X 36”	18” X 10” X 36”
WEIGHT	42-LBS	42-LBS	42-LBS

Work Table Included

Easy to Use Temperature Controller
