## Nylon CF2000 Series Constant Flow Supplied Air Assembly

- Breathing tube section close to face is soft and flexible
- Section behind back will not kink and interrupt air supply
- Swivel connection rotates 360 degrees so connection stays secure: no matter how much workers move around
- Y' breathing tube design goes over the shoulders so breathing tube is out of the way: lower profile on half masks to fit under welding helmets and faceshields
- No tools required
