

# HEAT GUN

MODEL HG-1

sealersales

Easily Heat Shrink PVC, POF, PET or PP

- **Dual temperature settings**
- **Economically priced unit**
- **90-day warranty**

Our value heat gun **HG-1-BLK** provides an efficient solution for finishing low and moderate volume shrink wrap applications. The heat gun can shrink PVC, POF, PET or PP film for uniform form fitting tamper proof packages. The heat gun offers dual temperature settings: Low (600°F) and High (1,000°F) and comes with a 90-day warranty. For high-volume production needs, we recommend exploring our shrink tunnel options such as our CN-4520A shrink tunnel.

#### Important Safety Note

When not in use, always rest the heat gun on its heel with the nozzle pointing upward. This ensures proper cooling and prevents heat buildup in the internal components. Never lay the unit flat on a work surface.

SPECIFICATIONS	HG-1-BLK
VOLTAGE	110V - 120V
POWER	1200W / 10AMPS
TEMPERATURE	600°F / 1000°F
NOZZLE OPENING	1-1/8"
CORD SET	5FT CORD / 3 WIRE GROUNDED
DIMENSIONS	13" X 3" X 8-1/2"
WEIGHT	1-LB 8-OZ
