

**BOUTIQUE
HOUSEHOLD LADDER**

Operating instructions

- Only suitable for family use,do not use it for industrial use.
- Max safe load 200 lbs.
- It is strictly forbidden to use a ladder after drinking, being sick, or taking medication.
- Be mindful of the metal ladder is conductive—keep away from live electricity
- Before using, you should check the parts beforehand.If there is any damage, such as bending, do not climb.
- The ladder's climbing surface must be facing forward; it cannot be used from the back.
- Ensure the safety lock on the top step is secured by inserting it into the positioning tube after opening the ladder.
- Avoid using on soft, uneven, or stepped surfaces.

Pay attention to

- When climbing, it is important to face the ladder and firmly grasp both sides with your hands.
- If you need to carry items while climbing, be sure to avoid over-loading.
- If the ladder's climbing height is not enough,don't extend it yourself or stand on tiptoe.
- Children should be supervised and assisted by adults when using ladders.
