Red light and buzzing sound

When the water tank is full, reach the water tank, water tank is in a wrong position, or water tank lid is not closed properly, the red light will be on and a buzzing sound will indicate. Need to pour the water out of the water tank and put it back in

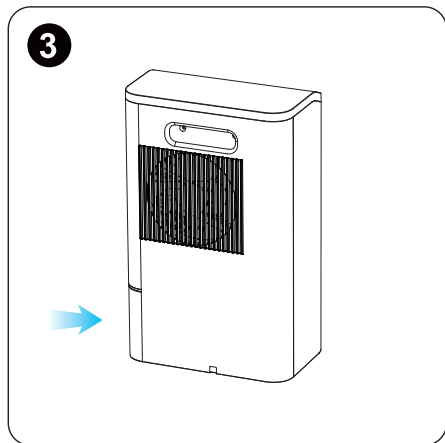

7 HOW TO REMOVE THE WATER TANK AND POUR OUT THE WATER

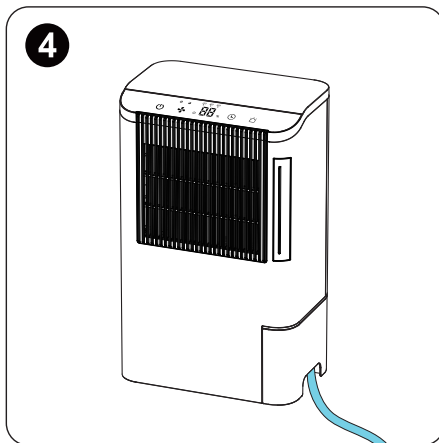

1. When the water tank is full, the Red LED Light will flashing and the dehumidifier will stop working automatically. Unplug the power plug and remove the water tank.

2. Remove the cover of the water tank and discard the collected water.

3. Place the cover back into the dehumidifier. To continue dehumidifying, plug the power plug and push the "ON/OFF" button again.

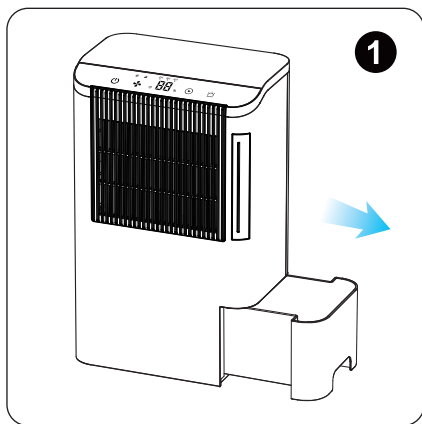

4. If you're using the dehumidifier in a bathroom, you can connect a drainage hose for continuous water discharge, eliminating the need for frequent water tank emptying.

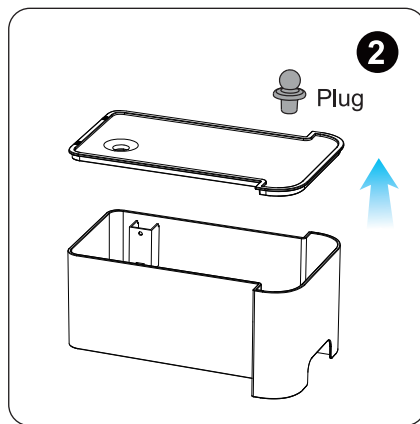

8

OPTIONAL CONTINUOUS DRAINAGE (BATHROOM OR BASEMENT)

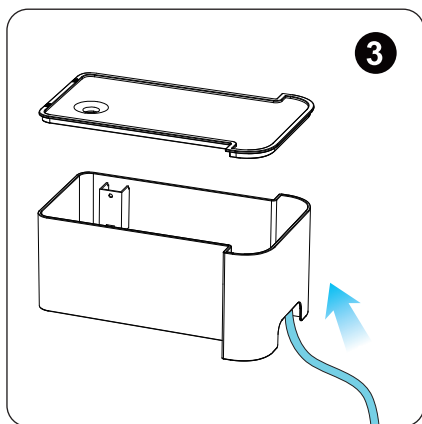

If you are using the dehumidifier in a bathroom or basement, you can consider connect a drainage hose for continuous water discharge.

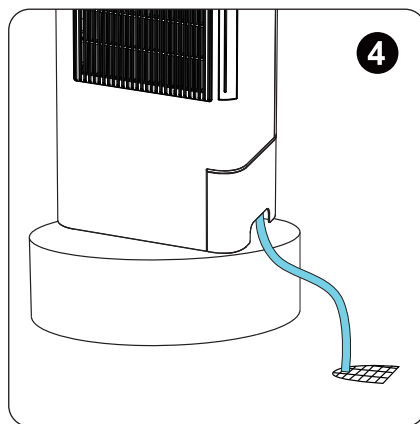

1. Remove water tank.

2. Remove the plug from the inside of the tank and keep it properly
(the plug will need to be reused later).

3. Insert the drain hose into the drain hole at the bottom of the tank.

4. Close the lid and put the tank completely in the dehumidifier.

9 TROUBLE SHOOTING

Problem	Possible Cause	Solution
The "Red LED" is flashing first when power connected	The water tank is full	Empty the water tank and place it in correct position
	The water tank is in a wrong position, or water tank lid is not closed properly	Place the water tank cover and water tank correctly
The dehumidifier doesn't work	The power supply is cut off	Check if the adaptor is plugged in
	Power socket loose	Check the power socket and the power cord, ensure it is connected well
	The air outlet is blocked	Maintain the minimum clearance at least 10cm around the dehumidifier when the unit is operating

10 CLEANING AND MAINTENANCE

Before cleaning and maintenance please pull out the plug out of the socket outlet. Wipe the shell of the appliance with a soft damp cloth, please do not use abrasive agent and solvent, otherwise, the appliance will damage.
