

ARMORWOVEN™

RUST PREVENTION VCI FILM

IRON-CLAD RUST PREVENTION FOR STEEL

Rust and corrosion can strike when you least expect it—during manufacturing, storage, or transport. You need iron-clad packaging that protects your steel coils, plates, sheeting, tubes, and bar stock, keeping them clean, corrosion-free, and performing at their best.

At ARMOR, your wish is our command with ARMOR WOVEN™—an ultra-strong, ultra-durable rust-prevention packaging material that is built to withstand harsh environments, long-term storage, and heavy-duty transport.

ARMOR WOVEN combines the strength of woven polypropylene with ARMOR's proprietary VCI (Vapor Corrosion Inhibitor) Nanotechnology® to create a physical and molecular rust-blocking shield for your metal parts. It provides powerful protection against moisture, ultraviolet light damage, and abrasion, offering long-lasting defense against rust and corrosion.

ARMOR WOVEN VCI FILM BENEFITS

- **PROTECTION:** delivers rust-free protection for storage or transport
- **SAFE:** prevents rust free of oils, solvents and other harsh chemicals
- **EASY-TO-USE:** minimal labor—simply wrap metal plates, coils, or bar stock
- **DURABLE:** polypropylene and woven construction resist rips, tears, and punctures
- **STRONG DEFENSE:** shields against moisture, UV damage, and corrosion
- **VERSATILE:** flexible material conforms to large or irregular-shaped metal parts, available in a range of sizes
- **COST-EFFECTIVE:** combines moisture barrier, tear-resistance and rust prevention

ARMORWOVEN™

RUST PREVENTION VCI FILM

A TOUGH, TEAR-RESISTANT RUST-PREVENTION POWERHOUSE

ARMOR WOVEN is built to handle the demands of heavy, oversized, and irregularly shaped steel. Its tight-weave construction offers strength, reinforcement, and tear resistance, making it a go-to solution for wrapping steel coils, sheets, bar stock and equipment that requires heavy-duty protection. By combining moisture resistance, tear strength, and rust prevention, it reduces material waste, cuts labor costs, and decreases rework or scrapping of metal.

For a convenient, hassle-free alternative to oil- or grease-based rust prevention, ARMOR WOVEN is the ideal choice. It uses ARMOR's proprietary VCI Nanotechnology® (our secret recipe for vapor corrosion inhibitor) to form a protective shield on metal that stops rust in its tracks.

All items on the Stock & Ready™ product list are in-stock and ready-to-ship with no order minimums.
