4 mm Halfmoon direct drive

Hex-Plus

Halfmoon, 4mm, Wera Series 9.
Drive: For direct machine drive.
Suitable for: Delvo, Densei etc.

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!
