Plastic strapping

EMPAX

Polypropylene strapping range

Reliable Performance

Manufactured with virgin material which provides consistent break strength, easy chute feeding and less strap waste.

Cost Effective Solution

Light weight and economical solution to general logistic and transportation security of the product.

Application Versatility

Available in a wide range of widths and thickness, it can be used for a variety of packaging applications.

Increased Productivity

Minimal strap cycle interruptions or misfeeds which improves machine uptime.

USA made, consistent outstanding quality across our entire range

Signode polypropylene strapping (PP Strand) is manufactured in our Florence (KY) production facility and designed for light to medium-duty applications, including palletizing, unitizing, bundling, carton closure and reinforcement. Our PP strap is available in multiple widths, thicknesses and strengths.

All Signode PP strand have controlled surface properties that minimize tensioning effort, increase tension transmission around corners and improve operating efficiency.

Signode plastic strapping is manufactured for use with hand or battery tools, general purpose and high-production power strapping machines. For optimal outcome, we recommend using Signode PP Strand with Signode strapping machines.
